DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is not clear how the rubber volume is required to be calculated. Specifically, it is not clear how the volume is calculated from the shaded area depicted in Figure 2: the examples in the specification give values for T and provide enough information to calculate δ , but it is not clear how to get from those values to the exemplary rubber volume values (what is the recited "depth size" and how is this used with T and δ to calculate the rubber volume?). Clarification is required.

In claims 2 and 3 "(mm)" (all occurrences) should be changed to -- in mm -- and in claim 2 after "rubber gauge" should be inserted -- in mm -- to clarify that the required units are in millimeters.

Allowable Subject Matter

3. Claims 1-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

As best as can be determined from the indefinite claim language as noted above, Takahashi (4,442,880) and the remaining prior art of record fail to disclose or suggest applicant's pneumatic bias tire having a rubber volume of 500-1350 mm² in the claimed environment.
